

Acceptable Masonry Water Proofers Products:

Upon approval or as instructed in the work order, any water-proofer used must contain a minimum 10 psi of pressure when applied. Utilize the below lists of approved waterproof products; do not use any other products without prior approval. Products used must always be photo documented in your vendor web update.

Approved Water-proofing Products:

DRYLOK Masonry Water-proofer (Latex)	DRYLOK Powdered
DRYLOK Extreme	Zinsser Drygard
Zinsser WaterTite	QUIKRETE Masonry Water-proofer
KILZ Basement & Masonry Water-proofer	BEHR Premium Basement & Masonry Waterproofer
DRYLOK Masonry Water-proofer (Oil)	

*If your Company has another product that meets the requirements of a minimum 10 PSI, it may be submitted to your Vendor Account Manager for review and approval.

Acceptable Stain-blocker Products:

Upon approval or as instructed in the work order, any stain-blocker used must contain a fungicidal agent. Utilize the below lists of approved stain-blocking products; do not use any other products without prior approval. Products used must always be photo documented in your vendor web update.

Approved Stain-blocker Products

<ul style="list-style-type: none"> • Zinsser WaterTite • Zinsser Shieldz • Aftershock Fungicidal Coating • ADD-2 Mildewcide (Additive) 	<ul style="list-style-type: none"> • Zinsser Perma-White • Zinsser Mold Killing Primer • MX-3 Mildewcide (Additive)* • Mildew Control (Mildewcide)*
--	---

*If your Company has another product that meets the requirements of having an explicit fungicide, it may be submitted to your Vendor Account Manager for review and approval.

*If an additive is used, photo detail must be provided. This includes a Before photo of the product validating the impact and dilution, a During photo showing the additive being placed in the paint (must see product falling into the paint), and an After photo showing the empty package/bottle. Should any of these photos be missing from the update, payment may not be made.
